

# Customer service that's never outsourced, but always outstanding. Another reason to switch to DayStar.

DayStar customers know they can rely on us for customized telecommunications solutions to enhance their businesses. They also enjoy rapid response and personalized customer service. At DayStar, providing outstanding customer service means never outsourcing our technical support staff. Our customers always talk to knowledgeable, friendly support technicians who live and work at DayStar, not some call center in another state or halfway around the globe.

Need same-day service? No major carrier can send a Service Technician to a customer's location the same day they report a problem, right? We can, and we often do. And at DayStar, we're always listening, measuring, and gathering customer input in a process of continuous improvement. Find out what truly outstanding customer service is all about. Call DayStar.

**Make the right choice. Make the switch to DayStar today.**

Making the switch is easy. Just call DayStar toll-free at 866-530-5736. We'll design a telecommunications package that is customized for the way you do business now, and in the future.
