

Set Up a Daystar Outlook Express E-Mail Account

The Internet Connection Wizard makes short work of setting up your online mailbox by walking you through each step for every e-mail account you set up.

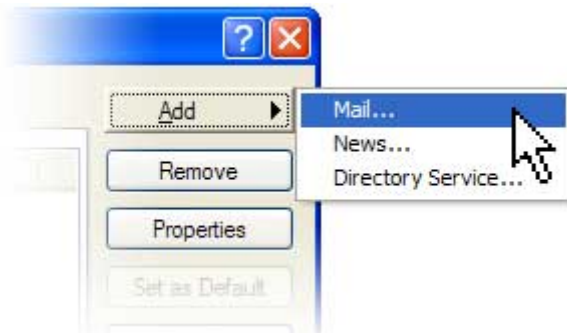

1. Before you get going, make sure you know your email address along with the following information.

First, information about the e-mail servers:

- The type of e-mail server you use: POP3
- The name of the incoming e-mail server: pop.daystar.net
- The name of the outgoing e-mail server: smtp.daystar.net

Second, information about your account:

- Your account name and password
 - We do not require you to use Secure Password Authentication (SPA) to access your e-mail account—no is all that's required.
2. Start Outlook Express, and on the **Tools** menu, click **Accounts**.
If the Internet Connection Wizard starts up automatically, skip ahead to step 4.
 3. Click **Add**, and then click **Mail** to open the Internet Connection Wizard.

Mail option from the Add button

4. On the **Your Name** page of the wizard, type your name as you want it to appear to everyone who gets e-mail from you, and then click **Next**.
Most people use their full name, but you can use any name—even a nickname—that people will recognize.
5. On the **Internet Explorer Address** page, type your e-mail address, and then click **Next**.
6. On the **E-mail Server Names** page, fill in the first block of information that you from above in step 1, and then click **Next** (see below).

This screenshot shows the "E-mail Server Names" window. At the top, it says "My incoming mail server is a POP3 server." Below this, there is a text box labeled "Incoming mail (POP3, IMAP or HTTP) server:" containing the text "pop.daystar.net". Further down, it says "An SMTP server is the server that is used for your outgoing e-mail." Below this, there is a text box labeled "Outgoing mail (SMTP) server:" containing the text "smtp.daystar.net".

Internet Connection Wizard's E-mail Server Names

7. On the **Internet Mail Logon** page, type your account name and password. It is important that you type in your full E-mail address in the "Account name" box (see example below).

This screenshot shows the "Internet Mail Logon" window. It has a blue header with the text "Internet Connection Wizard" and "Internet Mail Logon". Below the header, it says "Type the account name and password your Internet service provider". There are two text boxes: "Account name:" containing "customer@daystar.net" and "Password:" containing a series of dots. Below the password box is a checked checkbox labeled "Remember password". At the bottom, there is a note: "If your Internet service provider requires you to use Secure Password (SPA) to access your e-mail account, select the Log On Using SPA button."

Internet Connection Wizard's Internet Mail Logon

Note: If you're concerned about break-ins to your e-mail, click to clear the check in the **Remember Password** box. You'll then be prompted for the password each time you send or retrieve mail.

8. Click **Next**, and then click **Finish**.
You're ready to send your first e-mail!

Unsure if your new e-mail account is working? Send an e-mail message to a friend. If they get the message, your account is ready to roll! But if you run into problems setting up your account, Outlook Express offers help. Search for troubleshooting topics from **Contents and Index** on the **Help** menu.
