

# Zero. Zip. Nada.

That's how many customer service and billing complaints have been filed against DayStar Communications with the Florida Public Service Commission. While consumers have logged thousands of complaints against the traditional phone companies, our performance record remains unblemished. Why is our record so much better? It could be that we have the best understanding of the needs of business owners.

Looking for a phone company that means business? Look for the one with zero customer complaints. Call DayStar Communications at 1-866-530-5736 for information about calling features and service plans.

(Based on number of customer service and billing complaints filed with the Florida Public Service Commission from 2005 through 2007.)
